

MOHAMMED MUSTAFA HAJEEB

Full Stack Engineer

 Mohammed Mustafa Hajeeb •  mohammedmustafa47 •  Portfolio
 Bengaluru, India •  +91 9742898978 •  mustafahajeeb@gmail.com

SUMMARY

Backend-focused developer who turns complex problems into working products, with hands-on experience in user flows, development, **architecture, and debugging**. Strong in logical thinking and problem solving, leveraging AI-assisted development to prototype and deliver quickly.

EXPERIENCE

iTecz Solutions Pty Ltd

Full Stack Developer & AI Engineering Intern

November 2025 – February 2026

Australia (Remote)

- Built an **async RAG document ingestion pipeline** using Docling for PDF parsing, heading-aware chunking, Sentence Transformers for embeddings, and **Celery/Redis** workers for non-blocking uploads.
- Implemented **hybrid retrieval with cross-encoder reranking** using PostgreSQL (pgvector), vector similarity, heading/keyword matching, HNSW indexing, and automatic strategy selection for section-specific queries.
- Developed an **intent-aware conversational retrieval system** with LLM-based intent classification, follow-up query resolution, regex fallback, and resilient LLM integration with retries and cross-provider failover.
- Implemented **secure multi-user access** with JWT authentication and query-level data isolation, while evaluating retrieval quality against a test dataset to measure and improve system performance.

Freelance Web Developer

Client: Brothers Taxi – brotherstaxi.online

June 2026 – Present

Bhatkal, Karnataka

- Built and delivered a client-facing taxi booking website in **Angular**; raised the Google Lighthouse performance score from **25 to 75** via WebP image conversion, explicit image dimensions, and asset optimization.
- Implemented local **SEO** with structured metadata and location-targeted content to improve the client's organic search visibility.
- Diagnosed and resolved accessibility and security gaps (color contrast, heading hierarchy, missing CSP/HSTS headers), raising Lighthouse Accessibility and Best Practices scores from 93 and 73 to a perfect **100/100**.

ACHIEVEMENTS

1st Place – Web3 & Blockchain Track, Paetrix X Summit

DecentraliTrack | Solidity, Polygon, Smart Contracts (GitHub)

May 2026

- Won first place representing **Anjuman Institute of Technology and Management** by building a decentralized public infrastructure accountability platform using **Polygon smart contracts** for tamper-proof tracking of government-funded projects.

PROJECTS

CampusCast – College Digital Signage Platform

Django, PostgreSQL, WebSockets, React.js, React Native (Live Demo)

April 2026

- Implemented **WebSocket-based** real-time content push achieving **sub-1-second latency** for synchronized playback across multiple campus displays.
- Designed an **RBAC** system on **PostgreSQL** for staff, admin, and display roles, with a **React.js** admin dashboard and a **React Native** mobile app for scheduling and publishing content.

FOOD4U – Real-Time Food Donation Network

Django REST Framework, Ionic Angular, MySQL, JWT (GitHub)

August 2025

- Built a full-stack food donation platform with **JWT-secured REST APIs** and **role-based access control** across four roles — Super Admin, Area Admin, Volunteer, and Donor — each with its own portal.
- Implemented **OTP-verified email onboarding** and a workflow where Super Admins provision Area Admin accounts, with **object-level permissions** keeping each area's data isolated while coordinating pickups and reducing food waste.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, SQL, TypeScript

Frameworks & Libraries: Angular, Django REST Framework, Ionic, Next.js, React.js

Databases: MySQL, PostgreSQL (pgvector), Redis

AI & ML: AI Agents (Google ADK), LLM/API Integration, RAG

DevOps & Tools: CI/CD, Docker, GCP, Git, GitHub, Postman, Selenium

Concepts: DSA, JWT Authentication, RBAC, REST API Design, SEO

EDUCATION

Anjuman Institute of Technology and Management

Bachelor of Engineering (B.E.), Computer Science and Engineering — CGPA: 8.4 / 10.0

August 2023 – August 2027

Bhatkal, Karnataka
